IBM CLOUD SERVICES

Date	03 October 2022
Team ID	PNT2022TMID08189
Project Name	Hazardous area monitoring for industrial plant powered by IoT
Maximum Marks	4 Marks

By the end of this project you will:

- Gain knowledge of Watson IoT Platform.
- Connecting IoT devices to the Watson IoT platform and exchanging the sensor data.
- Gain knowledge on Cloudant DB
- Creating a Web Application through which the user interacts with the device.

Project Flow:

- Sending random Humidity and Temperature values will be sent to the IBM IoT platform
- Sensors values can be viewed in the Web Application
- Notifies the admin the random values cross the threshold value

To accomplish this, we have to complete all the activities and tasks listed below:

- Create and configure IBM Cloud Services
  - o Create IBM Watson IoT Platform
  - o Create a device & configure the IBM IoT Platform
  - o Create Node-RED service
  - o Create a database in Cloudant DB to store location data
- Develop a web Application using Node-RED Service.
  - o Develop the web application using Node-RED
- Develop a python script to publish the sensor data to the IBM IoT platform
